

GDS PARKING SENSOR

- Parking sensor based on dual detection technology
- Flood detector
- Low energy consumption, battery operated, estimated lifespan of 5 years
- Waterproof casing to withstand pressures above 15T
- Wireless technology
- Wide coverage range
- Automatic compensation of environmental factors
- Self-diagnosis of faults, low voltage alarm
- Arc discharge 12 kV, contact discharge 3 kV antistatic level
- On-site calibration

TECHNICAL FEATURES

Frequency	868 MHz
Casing material	ABS
Detection	Magnetic and ultrasonic
Report accuracy	99%
Battery life	5 years
Protection level	IP66
Storage temperature	From - 40° C to +85°C
Operating temperature	From -20°C to +70°C
Installation type	Buried
Dimensions	140 diam. x 40 mm
Weight	260g
